**FIG.1**

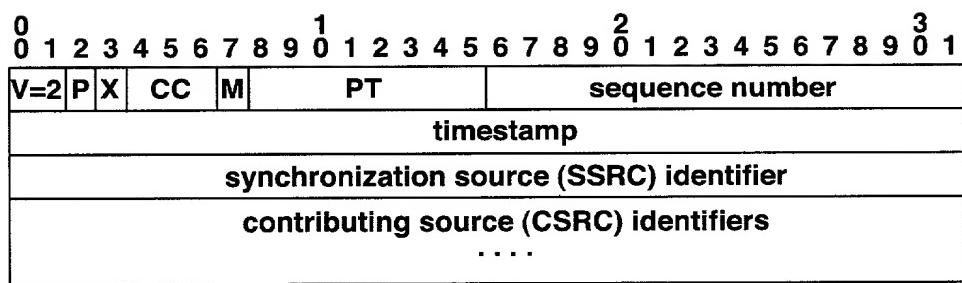

FIG.2

0	1	2	3	4	5	6	7	8	9	0	1	2	3	4	5	6	7	8	9	0	1
V=2	P	RC	PT=SR=200	length	header																
SSRC of sender																					
NTP timestamp,most significant word																					
NTP timestamp,least significant word																					
RTP timestamp																					
sender's packet count																					
sender's octet count																					
SSRC_1(SSRC of first source)																					
fraction lost		cumulative number of packets lost																			report block 1
extended highest sequence number received																					
interarrival jitter																					
last SR (LSR)																					
delay since last SR (DLSR)																					
SSRC_2(SSRC of second source)																					
...																					
profile-specific extensions																					

FIG.3

0	1	2	3	4	5	6	7	8	9	0	1	2	3	4	5	6	7	8	9	0	1																																					
V=2	P	RC	PT=RR=201				length														header																																					
SSRC of packet sender																					report block 1																																					
SSRC_1(SSRC of first source)																					1																																					
fraction lost		cumulative number of packets lost																			report block 2																																					
extended highest sequence number received																					2																																					
interarrival jitter																																																										
last SR (LSR)																																																										
delay since last SR (DLSR)																																																										
SSRC_2 (SSRC of second source)																																																										
...																																																										
profile-specific extensions
